## Grateful Sea Essential Oils Living doTERRA Nautrally

From the beginning of time, aromatic plants have long played an important role in human civilizations. They have been involved in religious ceremonies, shamanic services and many other unique experiences. They are recognized as the most effective medicine plants have to offer us.

Essential oils are aromatic compounds made from the plants bark, flowers, resin, leaves, and buds of plants. This uniqueness gives them the ability to work in many different facets including protection from viruses and bacteria! This is perhaps one of the most exciting things about essential oils, is their ability to protect and serve us because our cells are recognized by the same cell membrane when molecularly broken down.

This page is about the endless Sea of Grateful possibilities out there for help to our Healthcare crisis, with more money being spent on Healthcare then our own education system, we are right in being part of the Revolution! When you decide to live a wellness lifestyle your body, mind, and spirit are strong! Discover yourself in a drop, doTerra

## Why Choose doTERRA Over Other Oils? CPTG Quality Testing

Every batch of doTERRA® essential oils is subjected to strict requirements set forth in the CPTG Certified Pure Therapeutic Grade® quality protocol. This protocol ensures potency, purity, and consistency batch to batch.

The CPTG testing begins immediately after distillation with each oil being reviewed for its chemical composition. A second round of testing is carried out at our production facility to ensure that what was distilled and tested is the same essential oil as was received. A third review of the chemistry of the oil is conducted in a three-phase procedure as the oils are packaged into the bottles we use as consumers. Each of these tests confirms that the essential oil is free of contaminants and unexpected alterations during production.

The CPTG Certified Pure Therapeutic Grade quality protocol includes the following tests:

- Organoleptic testing

## Why Choose Grateful Sea Over Other Oil Distributors? Introducing the Passion of Anne Gramlich, Independent Wellness Advocate

I always knew I was a team player, but to what capacity that entailed, I never guessed it would lead me to where I am today. I've worked hard towards achieving my dreams, one of which was to own the family home that I was raised in. Two years ago, I bought that home. For a time afterwards, I was living from paycheck to paycheck. It was worth it to see the sunrise and sunset over the water everyday. Now, however, with the supplemental money I make each month from doTERRA, it's given me a sense of peace that I may not actually be paying for it forever!

I currently work for the Atlantic City Fire Department as an eight year veteran of the force, not to mention their first female and now only female. While this has always been a major accomplishment for me, my new passion in life is doTERRA essential oils. I can't live without them, and I wouldn't let myself. I have worked my way up to become a respected team leader and I have the knowledge needed to prescribe oils accurately for a variety of uses, and also the experience necessary to assist fellow team mates who are just starting out in the business. My goal is to empower as many people as possible and touch their lives with the gift of the Earth as I have converted my lifestyle over to doTERRA and I am not turning back! I am building an empire, I am part of the revolution! The Natural Solution, will you join me?
